

The competition for concrete sawing and drilling companies:

**DiamondAward 2013**

# Bauma 2013

## An internationally recognized competition

### Show the world, what you are able to do!

You still have the chance to demonstrate your professionalism. This special award for outstanding achievements in the area of concrete sawing and drilling will be awarded during **VU a U&\$%** (Apr 15 to Apr 21 2013) in Munich. Register now!

The "DiamondAward" is an established competition with a great tradition. The award was first held at BeBoSa 2000, followed by BeBoSa 2002, Bauma 2004 and 2007 and World of Concrete 2009 and 2011. During this time, the international participation and the quality of the entries has steadily increased.

### International recognition and a free trip to Munich !

Participation in the "DiamondAward" pays off in several ways. The opportunity to have your company name recognized throughout the industry is of great value. To be labeled a "Winner of a DiamondAward" is a landmark in the company's history and provides international recognition. Furthermore, the three winning entries will be invited to attend the award ceremony! This includes two flights to Munich and a hotel room for three nights / two guests. The award ceremony is scheduled for April 19 in the conjunction with the IACDS Bauma seminar during the Bauma Fair in Munich. Therefore, the ceremony will be witnessed by a broad range of experts and specialized journalists! This is quite an incentive, would't you agree?

## Please send your entry to:

International Association of Concrete Drillers & Sawers  
Oberdorfstraße 40  
CH-3053 Münchenbuchsee / Switzerland  
Tel +49 31 858 22 20 Fax +41 31 858 22 21  
info@iacds.org www.iacds.org

or your national association

### Everyone has a chance to win!

As in previous years the award is internationally published and open to all member companies of an association that are member of the IACDS.

The entries will be judged under the following criteria by an expert panel :

- Planning and complexity
- Innovation
- Degree of difficulty
- Quality requirements

### Easy to participate:

Send photos and descriptions of your project via email to the IACDS or your national association. Please use the attached information.

If you lack the time necessary to assemble everything, we can help you. We are happy for every entry!

Latest entry is: October 31, 2012
